RESOURCE PRODUCED
IN PARTNERSHIP BETWEEN

The School Games Organiser network and Active Derbyshire are working together to create and publish a weekly programme of activities to help support schools to assist parents and carers to maintain an active routine for children and young people whilst at home or when socially distancing in essential care.

The weekly activities will be sport themed and include golf, football, tennis, orienteering, athletics, cricket, gymnastics, boccia, netball and badminton. All activities have been developed so everyone can have a go using equipment found in the home and in whatever space you have available.

Children and young people should engage in moderate-to-vigorous intensity physical activity for an average of at least 60 minutes per day across the week. This weekly resource will give simple ideas on how to be physically active with a different sport theme for 30 minutes each day. For ideas on how to achieve the remaining 30 minutes please visit Active Derbyshire [website](#) or contact your local School Games Organiser by clicking on their logo within this resource.

This pack contains a schedule of suggested activity challenges for the week and daily activity cards. You do not have to do them in the suggested order or in fact do them all, if you really enjoy one day there is nothing stopping you doing that activity every day! However, if you do the personal challenge, we would encourage you to have a go at it each day and aim for improvement. There will be a virtual competition each Friday, details of how to enter are shown on the schedule page and on the Friday activity card. The competition will be run at district and county level. There will be prizes for schools with the highest percentage of entries based on pupils on roll, certificates for all entrants and a prize draw after the last week for those who have entered 100% of the virtual competitions. Please make sure that all activities are carried out in a safe manner.

We are very interested to receive your feedback so we can continue to do what works well but also make amendments to future weeks to ensure the resource is relevant and useful. Please send any feedback to derbyshireschoolgames@activederbyshire.org.uk

What is Orienteering?

Orienteering originated in Sweden in 1918. Youth leader, Ernst Killander wanted to make running more enjoyable so he set out courses in the forests using flags as markers, which were shown on the map given to each competitor. His idea was a great success and a properly organised sport soon developed. The competitor aims to complete a course by visiting a number of checkpoints marked on a large-scale orienteering map. At each checkpoint, or control, there is a marker and/or a punch which you use to prove that you have been there. The runners choose their own routes between controls, hopefully the best and quickest, and the winner is the person who visits all the controls and returns to base in the fastest time.

The history of Orienteering...

The Swedish Orienteering Federation was set up in the 1930s and the sport soon spread to nearby Finland and Norway. Scandinavia today has Orienteering clubs in every small town and many thousands of people compete. In 1970 7,400 orienteers from 20 nations competed in the annual "0-Ringen" event. 1966 saw the first World Championships which are now held every two years. These events used to be dominated by the Scandinavians but now many other European countries have strong competitors.
